

# PROLITE® COMPRESSIVE ANKLE SUPPORT WITH VISCOELASTIC INSERTS

**Model No: 40-450**

**Sizes: XSmall - XLarge**  
**Color: White**

## INDICATIONS:

- Mild Sprains
- Strains
- Tendonitis

## BENEFITS:

The ProLite® Compressive Ankle Support maintains full range of motion and provides uniform compression around the ligaments and tendons on the medial and lateral sides of the ankle. The anatomically contoured viscoelastic inserts cover the entire soft tissue area of the joint and support the medial and lateral sides of the ankle. As the ankle is moved, the inserts provide a gentle, compressive massage around the joint. This enhances circulation to help promote healing and minimize pain and swelling.

## PRODUCT FEATURES:

- Unique, anatomically contoured viscoelastic inserts around the ankle joint
- Made of lightweight elastic for a breathable alternative to neoprene
- Provides medial/lateral support

## HOW TO APPLY:

Simply slip support over ankle and position until the malleoli (ankle bones) are surrounded by the viscoelastic inserts. Support should fit snugly but not so tight it digs into skin.

## CARE INSTRUCTIONS:

Hand wash in warm water and mild soap. Wrap in towel to remove excess water. Do not twist or wring. Air dry away from heat. Do not tumble dry. Do not bleach.

## SIZING:

Measure around ankle just above ankle bone.

Size	Fits Ankles
X-Small	7 - 7 ½"
Small	7 ½ - 8"
Medium	8 - 9"
Large	9 - 10"
X-Large	11 - 12"
